PUBLICITY FOR CORPOR

SAYS IT IS ONLY

Deepest Interest of the Generation Lies in Control of Trusts.

Involves American Ideal of Equality Under Law, He Says.

Washington, D. C., Feb. 10 .- In his annual report, Herbert Knox Smith, nissioner of corporations, declares that the deepest interest of this generation lies in the control of its dominant commercial forces; the issue is moral, involving deeply our American ideal of equal opportunity under the law; it is financial, and on its outcome depends the ultimate stability of our business system. He says:

The corporation has become the accepted machinery for handring these forces. It is the artificial creature of the community. We have given it great powers and exemptions not permitted to the individual. We have made it effective. We have likewise made it capable of sinister misuse.

The corporation has concentrated enormous commercial power in the hands of a few men. At the same time it has lessened their personal responsibility for the proper use of that wer. Sense of personal obligation to the community becomes submerged in vast corporate entities. The resulting abuses call for some restraint that shall take the place of the old personal obligation. Government supervision and publicity of corporations must be that substitute.

National Insue.

The issue is national; action by the federal government is imperative under its unquestioned power and duty to regulate interstate commerce. The federal government is the only adequate Corporate managers are recognizing the authority; one of the primary motives for its creation was for a national contrel of national business. Those directing our great corporations have deifberately nationalized them in size and scope; they can not now be heard to it should be reserved as the last re-object to a centralized control which sort rather than used as the normal they themselves have made necessary. A LINIMENT FOR EXTERNAL USE.

Cheerfulness and a bright disposition during the months before baby comes, are among the greatest blessings a mother can bestow upon the little life about to begin. Her happiness and physical comfort will largely govern the proper development of the health and nature of the child. Mother's Priend contributes much to the mother's happiness and health by the relief and mental comfort it affords. It is a liniment composed of penetrating oils and medicines which lubricate the muscles and tendons of the body, soothe the swollen mammary glands, cause a gradual expansion of the skin and tissues, and aid in the relief of nausea. The regular use of Mother's Friend greatly lessens the pain and danger when baby comes, and assures a quick and natural recovery for the mother. Mother's Priend is sold at drug stores. It is one of the fundamental purposes of the bureau to make available for the average citizen, through the daily press, the information thus collected as to great interstate businesses. Accordingly, each of its published reports, many of which were several hundred pages in length, has been accom-panied with a summary, usually from 20 to 50 pages long, and again with a still more compact digest in the shape of a letter of submittal to the president, portant facts and conclusions as to permanent and significant conditions and tendencies in the industry under investigation, and has been the real medium of general publicity.
